

Pavel CHVOJKA & François-Marie GIBON. – **New replacement name for *Tinodes furcatus* Chvojka & Gibon from Madagascar (Trichoptera, Psychomyiidae)**

<http://zoobank.org/3B3B88D2-3CAF-4149-8BE2-6611587799CE>

(Accepté le 27.X.2017)

Six new species of the genus *Tinodes* Curtis, 1834, including *Tinodes furcatus* Chvojka & Gibon, 2017, have been recently described from Madagascar (CHVOJKA & GIBON, 2017). Subsequently, we have been alerted that *Tinodes furcatus* Chvojka & Gibon, 2017, is a junior primary homonym of *Tinodes furcatus* Li & Morse, 1997, from China (LI & MORSE, 1997: 278, as *Tinodes furcata*). According to ICZN, articles 57.2., 60.1., 60.3. (INTERNATIONAL COMMISSION ON ZOOLOGICAL NOMENCLATURE, 1999), the junior name is invalid, must be rejected and replaced either by an available and potentially valid synonym or, for lack of such a name, by a new substitute name. Since no synonym is available, we propose *Tinodes tatamaly* Chvojka & Gibon, **nomen novum** for *Tinodes furcatus* Chvojka & Gibon, 2017 (type locality: Madagascar, Fianarantsoa Prov., brook 2.5 km SE Ranomena, 21°29'36"S - 47°24'11"E).

Etymology. – “*tatamaly*”, derived from Tatamaly River. The species was discovered in one of its small tributaries.

ACKNOWLEDGEMENTS. – We are very grateful to Professor J. C. Morse for notifying us of this homonymy.
